## Summary

Frontend developer who cares about how things look and feel, not just whether they work – shipped live React and Next.js apps with 3D animations, canvas UIs, and REST API integrations. Looking for a frontend role where good craft actually matters.

## Education

- **United College of Engineering and Research** — Prayagraj, UP
  *Bachelor of Technology – Computer Science & Engineering* — *CGPA: 6.8* — *2021 – 2025*
- **MPVM Ganga Gurukulam** — Prayagraj, UP
  *Intermediate (10+2) – CBSE* — *83%* — *2021*
- **MPVM Ganga Gurukulam** — Prayagraj, UP
  *High School (10th) – CBSE* — *87%* — *2019*

## Technical Skills

| | |
|---|---|
| **Languages** | JavaScript, HTML5, CSS3, Python |
| **Frameworks** | React.js, Next.js, Tailwind CSS, Three.js |
| **Styling** | SCSS (Sass), Responsive Design, Mobile-first, Framer Motion |
| **Tools** | Axios, Git, Vercel, npm |
| **Concepts** | Component-based Architecture, REST API Integration, DOM Manipulation |

## Internships

**Full Stack Development Trainee** — Sep 2022 – Oct 2022 (Prayagraj, UP)
*Allsoft Solutions | IBM Business Partner*

- Completed an IBM Business Partner-certified training program on full-stack web development, building *Assignment 0* – a project using HTML, CSS, JavaScript, Node.js, and MongoDB.
- Designed and built the client-side interface, applying responsive layout and DOM interaction patterns from scratch (Ref. MO/SEP2022/E10203).

**Machine Learning Intern** — Jun 2024 – Jul 2024 (Prayagraj, UP)
*Department of CSE, MNNIT Allahabad*

- Delivered a U-Net model for medical image segmentation under a research team at MNNIT Allahabad, achieving 95.20% precision – an experience that sharpened my ability to ship real, working software under a deadline.

**AI/ML for Geodata Analysis** — Aug 2024 (Remote)
*ISRO | Indian Institute of Remote Sensing (IIRS), Dehradun*

- Worked on satellite imagery processing and predictive modeling under ISRO's Department of Space, Government of India.

## Projects

**Personal Portfolio** | *Next.js, Tailwind CSS, Framer Motion* | Live Site | GitHub

- Built and deployed a personal portfolio at shubhranshu.xyz using Next.js and Tailwind CSS, with Framer Motion animations, a modular component architecture, and a Resend-powered contact form.
- Integrated a custom domain via Namecheap, set up private email, and deployed on Vercel with CI from GitHub.

**PolypSeg AI – Frontend for Medical Image Segmentation** | *Next.js 14, Tailwind CSS, Three.js*| Live Site | GitHub

- Built a Next.js 14 UI with a 3D animated hero (Three.js), an image-upload demo panel, and animated performance counters, connected via REST API to a Flask backend serving a medical segmentation model.
- Deployed on Vercel with a configurable API endpoint, fully decoupled from the backend.

**Handwritten Digit Recognition App** | *React.js, SCSS, Axios*| Live Site | GitHub

- Built a React canvas-drawing UI where users draw a digit and get a live CNN prediction with a confidence bar and probability chart, sending data via Axios to a FastAPI backend.
- Styled the entire app in SCSS with a parallax scroll effect and a fully responsive layout for desktop and mobile.

**Data Analytics Portfolio Website** | *HTML, CSS, JavaScript*| Live Site | GitHub

- Built a dedicated frontend site to house all data analytics projects – project cards with live Tableau and Power BI links, built in vanilla HTML, CSS, and JavaScript without any framework.
- Demonstrates core DOM manipulation, CSS layout, and responsive design without relying on any library or build tool.

## Certifications

| | |
|---|---|
| **Accenture/Forage** | Data Analytics & Visualization Job Simulation |
| **Coursera/UC Davis** | SQL for Data Science |
| **Google Cloud** | Using Beam ML to catch Toxicity in Gaming |
