SUMMARY

Full-stack developer who has shipped complete web apps from database to deployment – React/Next.js frontends talking to Flask/FastAPI backends, both live in production. Comfortable on either side of the stack and happiest when owning the whole thing. ISRO and MNNIT Allahabad alum, looking for a full-stack role to keep building end-to-end.

EDUCATION

- | | | |
|---|------------------|------------------------------|
| • United College of Engineering and Research
<i>Bachelor of Technology – Computer Science & Engineering</i> | <i>CGPA: 6.8</i> | Prayagraj, UP
2021 – 2025 |
| • MPVM Ganga Gurukulam
<i>Intermediate (10+2) – CBSE</i> | <i>83%</i> | Prayagraj, UP
2021 |
| • MPVM Ganga Gurukulam
<i>High School (10th) – CBSE</i> | <i>87%</i> | Prayagraj, UP
2019 |

TECHNICAL SKILLS

Frontend	React.js, Next.js, Tailwind CSS, SCSS, Three.js, Framer Motion
Backend	Flask, FastAPI, Node.js, Express.js, REST APIs
Languages	JavaScript, Python, SQL, HTML5, CSS3
Databases	MongoDB, MySQL
Tools & Deploy	Docker, Git, Vercel, Render, HuggingFace Spaces

INTERNSHIPS

- | | |
|--|-------------------------------------|
| Full Stack Development Trainee
<i>Allsoft Solutions IBM Business Partner</i> | Sep 2022, 4 Weeks (Prayagraj, UP) |
| • Completed an IBM Business Partner-certified training program on full-stack web development, building <i>Assignment 0</i> using HTML, CSS, JavaScript, Node.js, and MongoDB – covering both the frontend interface and backend data layer (Ref. MO/SEP2022/E10203). | |
| Machine Learning Intern
<i>Department of CSE, MNNIT Allahabad</i> | Jun 2024 – Jul 2024 (Prayagraj, UP) |
| • Built a U-Net model in Python using TensorFlow and Keras for polyp segmentation in 1,500 colonoscopy images, achieving 95.20% precision and 0.87 F1-score – later wrapped into a Flask REST API and deployed as part of a full-stack app. | |
| AI/ML for Geodata Analysis
<i>ISRO Indian Institute of Remote Sensing (IIRS), Dehradun</i> | Aug 2024 (Remote) |
| • Applied Python-based ML techniques for satellite geodata processing and spatial statistics under ISRO's Department of Space, Government of India. | |

PROJECTS

- | | |
|--|--|
| PolypSeg AI – Full-Stack Medical Image Segmentation App <i>Next.js, Flask, TensorFlow, Docker</i> GitHub | |
| • Built the full stack: a Next.js 14/Tailwind/Three.js frontend with a 3D animated hero and image-upload demo panel, paired with a Flask REST API serving an Attention U-Net model (76.81% Dice score on CVC-ClinicDB). | |
| • Containerized the backend with Docker on HuggingFace Spaces and deployed the frontend on Vercel, connected via a configurable API endpoint – two independent deployments, zero coupling. | |
| Handwritten Digit Recognition – Full-Stack App <i>React, SCSS, FastAPI, TensorFlow</i> GitHub | |
| • Built end-to-end: a React/SCSS canvas-drawing UI sends drawn digits via Axios to a FastAPI backend running a TensorFlow CNN (98.74% validation accuracy) with a 10-step preprocessing pipeline. | |
| • Frontend deployed on Vercel, backend on Render – live, independently scalable, talking over HTTP. | |
| Personal Portfolio Website <i>Next.js, Tailwind CSS, Framer Motion</i> Live Site GitHub | |
| • Designed and built a personal portfolio at shubhranshu.xyz using Next.js and Tailwind CSS, with Framer Motion animations, a Resend-powered contact form, custom domain via Namecheap, and CI/CD from GitHub to Vercel. | |
| Data Analytics Portfolio Website <i>HTML, CSS, JavaScript</i> GitHub | |
| • Built a standalone frontend site in vanilla HTML, CSS, and JavaScript to showcase all data analytics projects – project cards linking to live Tableau and Power BI dashboards, no framework, no build tool. | |
